

Absence of SVHC as published by ECHA up to December 17, 2014

POLYFLAM® RIPP 510 D black - item 126704

Please be advised that we rely on the information provided to us by our raw material suppliers with regards to the finished products mentioned in the list above being free from Substances of Very High Concern ("SVHC") as additional additives in a concentration above the threshold limit of 0.1% w/w.

Notwithstanding the fact that the substances referred to in this declaration have not been intentionally added during the production process of the A. Schulman products, the absence of such substances has not been verified by analysis or tests and is therefore declared to the best of our knowledge and based on the information available to us from our raw material suppliers. It can therefore not be excluded that trace levels of these substances may be unintentionally present (amongst others because they may be ubiquitous in the environment) or may result from the specific characteristics of the raw materials or the manufacturing process and are therefore not picked up by our quality control.

This declaration does not warrant any specific properties and does not relieve processor from carrying out its own in-house tests and inspections amongst others to determine their suitability for a particular purpose.

It is the responsibility of the recipient of our products to ensure that any local applicable rules and legislation are observed.

This document is valid until the next relevant legislative and/or regulatory change.

The complete list can be found at the following link:
