To Whom It May Concern:

The M. K. Morse Company has received various inquiries as to our status regarding the new European REACH regulations. We have been working with an attorney and consultant to determine how the regulations apply to our products. It is our position that we manufacture and export an "Article" (not a chemical substance) as defined by REACH. Since our articles do not contain substances intentionally released during their use, we are not required to conform to the "pre-registration" rule.

The only regulation that applies to our products is whether they contain substances from the candidate list of "substances of very high concern" in a concentration of >0.1% (w/w) and totaling 1 ton per year. We are currently contacting our suppliers to make this determination. It is our understanding that we have until June 2011 to inform the agency of any SVHC in our product.

We expect to complete our supplier survey by July 31, 2009.

Best Regards,

James T. Batchelder
