Subject: **EU REACH Compliance**

West Coast Corporation has reviewed the REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) legislation and its applicability to the products manufactured and sold by our company.

As defined in Chapter 2 of the REACH legislation, the products manufactured and sold by West Coast Corporation are articles; an object which during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition. Additionally, West Coast Corporation products are not intended to release any substance during normal use of our products. As a result of this determination the products manufactured and sold by West Coast Corporation are applicable to the Registration or Authorization requirements of REACH.

In reviewing the individual products manufactured and sold by West Coast Corporation for the presence of substances on the list of Substance of Very High Concern (SVHC) for 247 candidate items in the last update by 21 January 2025, it was determined there are no SVHCs present above 0.1% as per (EC) No 1907/2006 in West Coast Corporation's products. This list can be found on the ECHA website, <https://www.echa.europa.eu/candidate-list-table>.

As a result of this determination, the products manufactured and sold by West Coast Corporation are not applicable to the Notification and Communication requirements of REACH. The determination on the presence of SVHCs in West Coast Corporation products is based on information which West Coast Corporation believes is reliable; however, the information is provided without representation of warranty, expressed or implied, regarding accuracy or correctness.

As a valued customer of West Coast Corporation, we understand the importance of the REACH legislation and the concerns our customers face in regard to REACH. West Coast Corporation will continue to review its products as they pertain to REACH moving forward.

Sincerely,

A handwritten signature in black ink, appearing to read 'V. Garcia', is positioned above the printed name.

Vince Garcia
